NOTE TO PARENTS

Rayman Brain Games is an educational action game specially designed for children aged 6-8. The idea is to create a fascinating game that will also serve as an educational tool to support a child's learning experiences in school.

Rayman Brain Games was developed in collaboration with a panel of professional education and early childhood specialists. The primary educational emphasis of the game is in math, spelling and reading. During its development, children helped test and evaluate the game. A primary school contributed to the creation of several of the exercises.

THE ADVANTAGES OF COMBINING A GAME WITH EDUCATION

The objective of Rayman Brain Games is to make the game so much fun and so exciting that children won't realize they are learning and practicing the basic skills they will need to excel in school. To achieve this goal, the educational elements are woven seamlessly into the game in the form of tasks. These tasks are fun exercises that help them practice a wide variety of basic learning skills.

In Rayman Brain Games, children can set their own pace. They can take as much time as needed to answer the questions or complete the tasks.

Action adventure games can be mesmerizing. That's why all educational exercises are placed outside of the exciting and more difficult game zones. In this way, the child is able to concentrate solely on completing the task, without being distracted by the game. To help alleviate frustration, a wrong answer only

requires going back and starting again at the last saved game.

The math activities that children encounter were chosen to reflect the standard curriculum in today's classrooms. The spelling and reading exercises include words chosen for their comparative difficulty and instructive value. Phonetic patterns are presented in the order in which they are commonly taught. Generally, the content of the exercises and activities in each level is meant to reflect the typical curriculum for that age group. However, every child learns at a different rate, and no two classroom experiences are alike, so there may be discrepancies between the suggested grade levels and your child's experiences.

If children have difficulty with the material, we encourage you to help them learn the new concepts by playing the game with them. You will find that, after time, they will learn the correct answers on their own and will need your help less often.

Again, because children learn and progress at different rates, they should be allowed to set their own pace. The game is designed with this in mind. We recommend that they don't use pencil and paper after becoming familiar with the game's format. They should be encouraged to solve the tasks mentally.

Although Rayman Brain Games can be classified as an educational action game, it is first and foremost a game. That's why we recommend that parents treat it as "edutainment."

STORYLINE

Happiness abounds in Rayman's world. There, he and Betilla the Fairy spend hour upon hour enjoying their imaginal world and watching over the Wizard's Magic Book of Knowledge. The Wizard, a very scholarly and philosophical person, has put all the secrets of wisdom and knowledge in this book.

But one day, the evil Mister Dark breaks into the Wizard's cottage, destroying everything in his path, even the map to his secret hideout! Now the world will be at the mercy of the evil Mr. Dark! So the Wizard and Betilla call for the one person who can save the world. They call for Rayman!!!

Rayman knows that the only way to retrieve the stolen Magic Book of Knowledge is to correctly answer all the questions demanded of him along the way. Each time Rayman successfully completes a challenge, he gets a piece of parchment which, when matched with all the other pieces, forms the map that will show the way to Mister Dark's hideout. Once the map is pieced together, a final test will give Rayman the chance to retrieve the Magic Book of Knowledge. Good Luck Rayman!!!!

STRUCTURE OF THE GAME

BETILLA'S GARDEN

To prepare yourself for the adventure and to learn the different uses of Rayman's powers, you can practice in Betilla's garden.

THE GOLDEN ADVENTURE RINGS

Twelve different golden rings separate the different worlds in the game. Of the twelve golden rings, there are six grammar and six math rings. Each ring deals with an activity corresponding to the curriculum from the Knowledge Learning Level you have chosen. To reach Mister Dark's hideout and finish the game, all activities must be successfully performed in all twelve worlds.

STRUCTURE OF AN ACTIVITY

Each golden ring corresponds to a certain activity which has five stages. Once you complete the activity, you get one piece of the parchment showing the way to Mr. Dark's hideout. At the end of the fourth stage, new paths open up on the Map of the Worlds to new activities. The fifth stage is a bonus stage, where unlike the previous 4 stages, the players plays against time.

NAME OF THE ACTIVITY

ART ALLEY - IDENTIFYING AND READING SOUNDS

Using both audio and visual discrimination skills, this activity reinforces children's knowledge of the phonic rules of the English language.

PEEBLE PERIL - NUMERAL RECOGNITION

It allows children to progress with confidence as they learn about the relationship between numbers and their values.

RING RHAPSODY - WORD SEARCH

In this, children will practice recognizing the visual patterns associated with the pronounced sounds.

COPTER CANDY - PLACE VALUE

Requires your child to understand how the digit placement affects the value of a number.

BUTTERWEED BOG - ADDITION AND SUBTRACTION

The addition and subtraction problems in this activity will help children learn basic math facts. This activity will also help children develop the ability to solve math problems mentally.

ERASER REBOUND - COMPARING, ORDERING AND SKIP-COUNTING

In this activity, children will use addition and subtraction and practice logical thinking skills as they complete sequential sets.

ROCKY ROAD - READING, COMPREHENSION, VOCABULARY GROUPS

In this activity, children practice careful reading to classify words according to their meaning.

SLICK SLOPES - SPELLING

This game gives children an opportunity to actively practice spelling words.

CRAZY CAVES - COUNTING AND MULTIPLICATION

Being able to recognize the value of configurations and sets is a skill which helps children to perform the operations of addition and multiplication.

RISEING TIDES - ALPHABETICAL ORDER

Classifying words and letters in alphabetical order will help to develop their reading and writing.

PERCUSSION PATH - COMPARISONS

In this challenging activity, children will again practice their arithmetic skills, and develop their ability to estimate.

TASTY CHASE - SPELL CHECK

This activity allows children to practice their spelling skills and encourages the use of visualization as a spelling strategy.

THE END OF THE GAME

As soon as the Magic Book of Knowledge is found and taken away from Mister Dark, the game is completed.

IMPROVE YOUR GAME

PHOTOGRAPHER

When you meet the photographer, put yourself in the middle of the panel and he will take your picture. Now, if you accidentally lose a life, you don't have to go all the way back to the beginning. Instead, you will start again at that spot.

BLUE BUBBLES

To find your way through the different activities, follow the blue bubbles. They will show you the right path or the spot where a life, a super power, or a golden fist can be found. As soon as you obtain 50 blue bubbles, you earn a free life. Listen carefully! If you hear a loud noise while going over a blue bubble, it means that you are close to something important and you better search for it.

SUPER POWER BALL

The red super power ball gives you five energy points. If you lose your life, you will have to start again with only three energy points.

FINISH LINE

You need to find the finish line to complete each stage. As soon as you touch it, the activity is over and you can move on to another world.

SPEED FIST

This fist accelerator lets you increase the speed of your fist. The more you find, the faster your fist goes!

GOLDEN FIST

With the help of the golden fist, your strength will grow.

EXTRA LIVES

To get it, you must either touch it or punch it and pull it towards you.

THE MAGICIAN'S HAT

When you go over this hat, you'll hear the Magician give you the instructions for the exercise. You may go over it as many times as you wish to repeat the instructions.
